

NATURE ART Scavenger Hunt

Loose parts are everywhere in our landscape from pine cones to rocks to birch bark, to feathers, to acorns. Go out into your backyard and search for natural objects on the ground. Try to collect only that which is unattached to a life form. Moss, for example, is living and will die if it is uprooted. A fallen pine branch from the last wind storm though, provides a lovely green to your art and isn't harming the tree! After gathering your "art" supplies find flat ground to start creating a pattern. To begin, choose a shape: a triangle, a circle, a square, a plus sign etc. and make it out of one of your objects. Expand from there and create a pattern! It is ephemeral art and will fade back into the earth over time. Take a photo of your art and paste below. Or, draw it!
