The 2-minute Tarp!

1. **Tie** bowline knot at both ends of the rope and attach carabiners
2. **Measure** perimeter of tree and **tie** alpine butterfly knot far enough down rope to connect with carabiner end when wrapped around tree
3. **Wrap** rope around tree and clip carabiner into second loop to secure.
4. **Wrap** knots in duck tape to prevent slipping ad loosening
5. **Tie** appropriate lengths of paracord to each corner eyelet with enough to wrap around 4 corner trees. **Tie** a double knot loop at the free end and **attach** carabiner.
6. **Find** 4-6 evenly spaced points along paracord line to **tie** alpine butterfly knots to create "belt" of length options.
7. **Wrap** around corner tree and **clip** carabiner to appropriate loop
8. Simple storage!
